Enhanced Taste and Clarity | Improved Health Potential | Remove PFAS ("forever chemicals") and a variety of pharmaceutical compounds | Encourages Healthy Hydration | Reduced Reliance on Bottled Water | Cleaner Cooking and Food Preparation | Enhanced Taste of Food | Purer Ice Cubes

# UNDER SINK FILTER | 14 inch

## PFAS & Pharmaceutical Filter

Safeguard Your Drinking & Cooking Water from Emerging Contaminants

Experience unparalleled protection with the Brita PRO PFAS & Pharmaceutical Filter. This advanced filter tackles emerging concerns and provides comprehensive filtration for cleaner, safer drinking & cooking water.

### Multi-Threat Defense

This innovative filter goes beyond traditional filtration by addressing emerging contaminants like PFAS ("forever chemicals") including PFOA and PFOS. It also dramatically reduces a variety of pharmaceutical compounds, offering a multi-layered defense for your water.

### Superior Filtration Media

Made with premium activated carbons, this filter effectively removes impurities while enhancing your water's taste and odor.

### Reduced PFAS Exposure

The primary benefit is reducing PFAS (per- and polyfluoroalkyl substances) from your drinking & cooking water supply. PFAS are linked to various health problems, and the Brita PRO PFAS & Pharmaceuticals Single-Stage Filter can significantly reduce your exposure through drinking & cooking.

### Reduces Plastic Bottle Waste

By having cleaner, better-tasting water on tap, you'll be less likely to rely on bottled water, which reduces plastic waste.

### Not all filters are effective against PFAS

Look for filters specifically certified to remove PFAS.

### Cold Water Use Only

Please note that this filter is designed for cold water use only.

### Trusted Quality

This system is manufactured in an IAPMO certified facility and certified by IAPMO R&T to meet NSF/ANSI Standard 401 & 53 giving you the assurance of a safe and reliable product for significantly reducing PFAS & Pharmaceuticals in your drinking and cooking water.
